OFFICIAL CREATOR BRIEFING · $SECT

Sectora Foundation

Everything for your video: the burn, verifiable security, the press coverage, the website tour and how to buy $SECT.

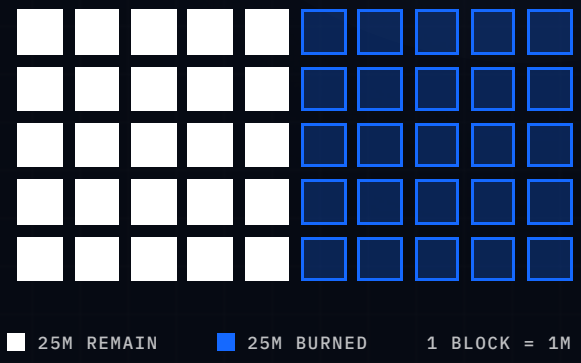

LEGAL NAME	Sectora Foundation IL
HEADQUARTERS	Chicago, Illinois, USA
REGISTRATION	Illinois Secretary of State · No. 18523639

THE 50% BURN · THE MOST IMPORTANT POINT

50,000,000 → 25,000,000 $SECT

25 million $SECT are burned permanently. After that, the supply is fixed: the contract has no function to create more.

15 MAR 2027 · 00:00 UTC

PUBLISHED IN 12 OUTLETS

AP News / Benzinga / BeInCrypto / Watcher Guru / CoinGape / Bitcoinist
Cryptopolitan / U.Today / AMBCrypto / CoinCodex / NewsBTC / Finbold

- ✓ Renounced contract
- ✓ Audited by Cyberscope
- ✓ $1M liquidity locked
- ✓ 0% tax

The video starts here

Make this statement at the start, before showing anything else. It is mandatory and goes in the first seconds.

$SECT is not a presale or a private round. It is a token on the open market: it is already listed on CoinGecko and trades on Uniswap, and anyone can buy or sell it whenever they want. And it is made to hold: to keep while the project moves forward, not for short-term speculation.

Sectora is a growing project that has not yet developed its price scale, as other projects that have already grown did.

Text to read at the start (00:00):

> **"Before we begin: this is not a presale or a private round. $SECT already trades on the open market, it is listed on CoinGecko, and you can buy and sell it whenever you want. It is made to hold for the long term. Sectora is a growing project that has not yet developed its price scale, as other projects that have already grown did."**

A free token and the founders' statement

$SECT is a free token: anyone can buy or sell it on Uniswap whenever they want, at the market price. There is no access list, minimum, lock or permission from the foundation.

Line for the video: *"Anyone can buy and sell $SECT whenever they want. It is a free token."*

The founders' statement (text from the website, ref. SF·ST·01·26):

> **#SECT is not a *pump and dump* token. It is a token made to hold while the project moves forward and grows, not for short-term speculation. The fixed supply, the renounced contract, the locked liquidity and the public audit remove the mechanisms those schemes depend on. Every holder is free to buy and sell whenever they want, without restrictions.**

Short version for the video: *"The founders say it clearly: this is not a pump and dump. It is a token to follow the project, and every holder buys and sells whenever they want."*

Summary in 30 seconds

Sectora Foundation is a company registered in Illinois, USA, that builds security software for crypto and for tokenized real-world assets. $SECT is the token of its network: ERC-20 on Ethereum, bought on Uniswap.

The core message of the video: **a token with rules anyone can check**.

- **The 50% burn:** on March 15, 2027, 25 million $SECT are burned and the supply goes from 50 to 25 million, forever. Nobody can create more.
- **Trust:** renounced contract, verified on Etherscan and audited by Cyberscope; $1,000,000 of initial liquidity locked.
- **Backing:** 12 outlets have already published about Sectora, including AP News, Benzinga, BeInCrypto and Watcher Guru.
- **Free buying and selling:** anyone buys or sells on Uniswap whenever they want, with no permissions or locks. SECT/USDT pair, contract `0x8C9984B06281f1CA9416e493c2E602AaB08513db`.

Website tour, step by step

The video can be a tour of sectoraorg.com from top to bottom, in the order the sections appear. The key moments are **the burn** (steps 1, 4, 5 and 10) and **the press** (step 12).

1. **Home.** Show the token sheet: 50,000,000 initial supply, **25,000,000 after the burn**, 0% tax, renounced contract and listed on CoinGecko. Point to the line *Supply reduced by 50%*.
2. **What Sectora is (01).** Explain it in one sentence: security software for crypto and real-world assets, from a company registered in Illinois.
3. **Verification (02).** Open the four independent records: the Cyberscope audit, the Illinois registration, the CoinGecko data and the Team Finance liquidity lock. Highlight two points: **the contract is renounced**, so nobody can change the token's rules, and **the team holds no tokens**.

   ACCESS FROM OUTSIDE THE UNITED STATES · VPN WITH A US EXIT

   The Illinois Secretary of State portal only accepts connections that originate inside the United States. To check it from another country, connect through a VPN with a US IP address.

   This is a geographic restriction of the State portal itself, not of the registration. The record is public and shows the same information from any location; the VPN only lets you reach the portal.

   1. **Install a VPN.** Any well-known VPN with servers in the United States. It works on a phone or a computer.
   2. **Connect to a server located in the United States.** For example, Chicago or New York. Wait for the VPN to confirm the connection: your IP address will become a US one.
   3. **Open the search:** apps.ilsos.gov/corporatellc. If it does not load, close the browser, open it again and go back in.
   4. **Choose *File Number*** as the search mode.
   5. **Type 18523639** and press *Submit*.
   6. **Check the *File Detail Report*:** name **Sectora Foundation IL**, status, jurisdiction IL, incorporation date and registered agent.
   7. **Optional:** from that same page you can buy an official state *Certificate of Good Standing*.

4. **Founders' statement (03).** Read the founders' statement: this is not a pump and dump. Show the two rules: a maximum supply of 50 million with no *mint* and **the 50% reduction on March 15, 2027**.

5. **Why hold #SECT (04).** Show the four products in final testing and the **live burn countdown**. Walk through the sequence: Uniswap today, the burn, exchange listings and products in production.
6. **Holder rewards (05).** Staking on mainnet: 14.9% APY, every second, no lock.
7. **Hash Market (06).** Try it on testnet: 80% of every hash purchase is burned on the spot.
8. **Distribution (07).** No presale or rounds: anyone buys and sells freely on Uniswap.
9. **Our projects and Roadmap.** The 7 products and the phases through 2027.
10. **Tokenomics · Supply & market cap.** The central moment of the video: **from 50,000,000 to 25,000,000 on March 15, 2027**. Open the calculator and do the math with the **current supply of 50M**: choose 1% and read, row by row, the price $SECT would reach with just 1% of the market cap of XRP and each project. Then switch to 25M and show how the price doubles with the burn.

PROJECT	MARKET CAP	$SECT AT 1% · CURRENT SUPPLY 50M	AT 25M · AFTER THE BURN
XRP	$84,311M	**$16.86**	**$33.72**
Solana	$62,259M	**$12.45**	**$24.90**
TRON	$31,500M	**$6.30**	**$12.60**
Hyperliquid	$18,013M	**$3.60**	**$7.21**
Dogecoin	$12,660M	**$2.53**	**$5.06**
Chainlink	$9,532M	**$1.91**	**$3.81**
Cardano	$8,608M	**$1.72**	**$3.44**

Market caps from CoinGecko, Oct 15, 2026. The website calculator updates them live. Calculation: 1% of the market cap ÷ $SECT supply.

11. **Market context.** The tokenized real-world asset market that Sectora protects.
12. **Press. 12 outlets** have published about Sectora: AP News, Benzinga, BeInCrypto, Watcher Guru, CoinGape and more. Open 2 or 3 articles on screen.
13. **Events.** Sectora will be at Bitcoin 2027, Consensus 2027 and Blockchain Forum 2027.
14. **CoinGecko chart.** Open coingecko.com/en/coins/sectora and show the live price chart, the market cap and the volume. It is the proof that $SECT trades on an open, public market.
15. **Community.** Press *Buy SECT on Uniswap* and show the purchase (see *How to buy $SECT, step by step*).

To go deeper, open the whitepaper at sections 05 (Supply Positioning), 06 (Comparison · Market Cap) and 14 (Supply & Buyback).

The burn and the supply (the most important point)

On **March 15, 2027 at 00:00 UTC**, 25,000,000 $SECT are burned: the supply drops from 50,000,000 to 25,000,000 and stays fixed forever. It is a single burn, scheduled and announced since launch.

How to explain it in the video:

- **Before the burn:** 50 million $SECT exist. The contract has no function to create more (no *mint*).
- **The burn:** half of the supply disappears permanently on March 15, 2027. The website has a live countdown.
- **After:** 25 million remain and it can never go up, because the contract is renounced and has no *mint*.
- **Extra burn with the Hash Market:** 80% of every purchase of hash power is burned on the spot. Today it runs on testnet with test tokens; the same rules will move to mainnet with $SECT.

Supply comparison

With 25 million, $SECT sits close to Bitcoin's cap and far below Ethereum.

ASSET	SUPPLY (UNITS)
Bitcoin	21,000,000 (maximum)
$SECT after the burn	25,000,000
$SECT today	50,000,000
Ethereum	more than 120,000,000

The website's supply calculator

On sectoraorg.com, section *Supply & market cap → Comparative scenario*:

1. Choose the supply: 50M (today) or 25M (after the burn).
2. Choose a percentage: 1%, 5% or 10%.
3. The table takes each network's real market cap from CoinGecko, applies that percentage and divides it by the $SECT supply.

A good moment for the video: show how the result changes when you switch from 50M to 25M. That explains the burn without making a single promise.

Mandatory when showing it: *"This is a comparison exercise, not a price prediction."* The website itself says so.

Reference data: launch price $0.10, reference valuation of $5,000,000 at listing, 0% tax on buying or selling.

Press coverage

12 outlets published Sectora's releases in October 2026. In the video it is enough to show 3 or 4 logos and say “12 outlets in total”.

OUTLET	DATE	RELEASE
Watcher Guru	Oct 15, 2026	Final testing and $SECT on Uniswap
BeInCrypto	Oct 15, 2026	Final testing and $SECT on Uniswap
CoinGape	Oct 15, 2026	Final testing and $SECT on Uniswap
U.Today	Oct 14, 2026	Final testing and $SECT on Uniswap
AMBCrypto	Oct 14, 2026	Final testing and $SECT on Uniswap
CoinCodex	Oct 14, 2026	Final testing and $SECT on Uniswap
NewsBTC	Oct 14, 2026	Final testing and $SECT on Uniswap
Finbold	Oct 14, 2026	Final testing and $SECT on Uniswap
Cryptopolitan	Oct 14, 2026	Final testing and $SECT on Uniswap
Bitcoinist	Oct 14, 2026	Final testing and $SECT on Uniswap
AP News	Oct 5, 2026	$SECT launch
Benzinga	Oct 5, 2026	$SECT launch

These are press releases published by the foundation in those outlets, not opinion articles. Say it like this: “Sectora was featured in AP News, Benzinga, BeInCrypto…”, never “AP News recommends Sectora”.

Our products

Sectora has 7 products on the same security layer. Staking already runs on Ethereum mainnet. Four products have a finished interface and are in final testing on testnet.

PRODUCT	WHAT IT DOES	STATUS	LINK
Staking	Deposit $SECT and earn 14.9% APY, every second. No lock: withdraw whenever you want.	Live on mainnet	Staking
Blockchain Layer 3 + SectoraScan	Network for tokenized assets, with a public explorer.	Final testing on testnet	SectoraScan
Sectora DEX	Decentralized exchange for the network's assets.	Final testing on testnet	DEX
Hash Market	Buy hash power: 80% is burned and 20% pays rewards. Register your security node.	Final testing; live on testnet with free tSECT	Dashboard

PRODUCT	WHAT IT DOES	STATUS	LINK
Sectora Shield	Post-quantum security with the NIST FIPS 203, 204 and 205 standards.	Final testing on testnet	Security
Asset tokenization	Issuance and management of real-world assets on the network.	Open on testnet	Tokenization
USD-SEC stablecoin	A dollar unit for payments within the network.	In development	—

For the video: the Hash Market can be tried for free. Connect MetaMask on Sepolia and claim 5,000 test tSECT every 24 hours. tSECT have no value.

Next milestone: the burn on March 15, 2027. The roadmap also includes the L3 network launch on mainnet and a presence at Bitcoin 2027 (Nashville), Consensus 2027 (Miami) and Blockchain Forum 2027 (Moscow).

How to buy $SECT, step by step

$SECT is bought on Uniswap, on the Ethereum network, with the SECT/USDT pair. No sign-up or anyone's permission is needed.

1. Install an Ethereum-compatible wallet: MetaMask, Trust Wallet or Coinbase Wallet.
2. **Transfer from your exchange to your wallet.** On your exchange (Binance, Bybit, Coinbase, OKX or another), withdraw ETH to your MetaMask or Trust Wallet address. When withdrawing, choose the **Ethereum network (ERC-20)**. $SECT is not bought inside the exchange: it is bought from your wallet.
3. **The easiest way: buy directly with ETH.** Just transfer ETH, swap it for $SECT on Uniswap and you are done. You do not need USDT. Leave a little ETH in the wallet to pay the network gas.
4. Go to sectoraorg.com and press **Buy SECT on Uniswap**. Using the official link avoids fake tokens.
5. Check that the contract is `0x8C9984B06281f1CA9416e493c2E602AaB08513db`.
6. Connect the wallet, enter the amount and review the price impact before confirming.
7. With ETH, confirm the swap and you are done. If you pay with USDT, approve it the first time and then confirm the swap.
8. If you do not see $SECT in your wallet, import it with the contract address.
9. Optional: deposit it in staking to earn 14.9% APY, with no lock.

If the wallet app does not calculate the network fee, open app.uniswap.org from a computer or from the wallet's own browser. The pair and the route are the same.

Direct buy link with ETH: Uniswap · ETH → $SECT

Direct buy link with USDT: Uniswap · USDT → $SECT

Security and trust

Every point can be checked without asking the foundation for anything. Ideally, open the link in the video and show it on screen.

POINT	WHAT IT MEANS, IN SIMPLE TERMS	HOW TO CHECK IT
Cyberscope audit	An external firm reviewed the contract. The full report is public.	Audit report
Renounced contract	Nobody, not even the team, can change the token's rules.	Contract on Etherscan
Contract verified on Etherscan	The code is published and anyone can read it.	Code on Etherscan
No *mint* function	New tokens can never be created.	Contract on Etherscan
0% tax	The token charges no fee on buying or selling. You only pay Ethereum gas and the normal Uniswap fee.	Audit
Locked liquidity	The $1,000,000 of initial liquidity is locked with Team Finance. The foundation does not control it.	Lock on Etherscan
No presale or rounds	There was no presale, private round or allocation to investors. Nobody bought cheaper than the public.	sectoraorg.com
The team holds no tokens	According to the foundation, the team holds no $SECT in its name.	Foundation statement
Registered company	Sectora Foundation is registered in Illinois, USA, under No. 18523639.	Illinois registry (with a US VPN if you are abroad) · Legal documents
