Sectora ($SECT) – Cybersecurity and RWA token

1. INTRODUCTION

This document contains the official information that Sectora Foundation provides to the content creators taking part in the $SECT launch campaign. It sets out the points to be covered in the video, the purchase procedure and the verification link for each fact. Please check the information against those links before publishing.

2. PROJECT FACT SHEET

- Project: Sectora Foundation, a cybersecurity firm for the crypto ecosystem and tokenized real-world assets (RWA).

Verification: https://sectoraorg.com

- Token: $SECT, ERC-20 standard on the Ethereum network.

Verification: https://etherscan.io/token/0x8c9984b06281f1ca9416e493c2e602aab08513db?a=0xa12a11fc202827b7c734cf2019f2c7a6cf061d69

- Maximum initial supply: 50,000,000 $SECT, to be reduced to 25,000,000 through the scheduled supply reduction.

Verification: https://etherscan.io/token/0x8c9984b06281f1ca9416e493c2e602aab08513db?a=0xa12a11fc202827b7c734cf2019f2c7a6cf061d69

- Taxes: 0% on buys and 0% on sells.

Verification: https://sectoraorg.com/docs#s03

- Entity: company registered in Chicago, Illinois, United States, file number 18523639.

Verification: https://sectoraorg.com/docs#s02

- Market: Uniswap V3, SECT/USDT pair.

Verification: https://app.uniswap.org/explore/pools/ethereum/0xa12a11fc202827b7c734cf2019f2c7a6cf061d69

- CoinGecko: $SECT is listed on CoinGecko, with price, market capitalization and market data.

Verification: https://www.coingecko.com/en/coins/sectora

3. POINTS TO COVER IN THE VIDEO

The video walks through the official website, sectoraorg.com, from top to bottom and in this same order. Each point says what to say, what to show on screen and where to check it.

3.1 What Sectora is (website section 01)

- What to say: Sectora Foundation builds security software for the crypto ecosystem and for tokenized real-world assets (RWA). It is a company registered in Illinois (United States), and $SECT is the token of its network.

- What to show: the homepage and the "What Sectora is" section.

Check: https://sectoraorg.com/#what

3.2 Verification (section 02)

- What to say: everything can be checked without asking the foundation for anything. The Cyberscope audit is passed, the company is registered in Illinois (no. 18523639), price and volume are on CoinGecko and the liquidity is locked with Team Finance.

- What to show: the four cards of the "Verification" section.

Audit: https://www.cyberscope.io/audits/sect

Company registration: https://sectoraorg.com/docs#s02

CoinGecko: https://www.coingecko.com/en/coins/sectora

Locked liquidity: https://etherscan.io/nft/0xc36442b4a4522e871399cd717abdd847ab11fe88/1360231

3.3 The founders' message (section 03)

Must be included in the video:

> "Sectora's founders are clear: $SECT is not a pump-and-dump token. It is a token built to be held as the project progresses and scales, not for short-term speculation. The fixed supply, the renounced contract, the locked liquidity and the public audit remove the mechanisms that pump-and-dump schemes rely on. Every holder is free to buy and sell whenever they choose, without restrictions. The project advances with each milestone, starting today: from the products already live on testnet to the 50% supply reduction."

- What to show: the "Founders' statement" section.

Check: https://sectoraorg.com/#statement

3.4 Why hold $SECT (section 04)

Must be included in the video:

> "Why hold $SECT? Because everything is still ahead. Every milestone Sectora describes is still in front of the token, and that is a matter of record, not opinion. $SECT trades on Uniswap, on Ethereum: the supply reduction has not happened yet and no centralized exchange has listed it. Four products, the Layer 3 blockchain, the DEX, the hash market and the Sectora Shield cybersecurity software, already have finished interfaces and are in final testing on testnet. The calendar published by Sectora Foundation is this: on March 15, 2027, the supply reduction from 50 to 25 million $SECT; after that, exchange listings; from Q2 2027, the products in production; and in April 2027, the opening of the NYSE process. A holder today is positioned before every one of those events, not after them. Nothing about that is a forecast: it is simply where the calendar is."

- What to show: the "Why hold #SECT?" section: the four products, the supply reduction countdown and the calendar.

Check: https://sectoraorg.com/#why

3.5 Staking: 14.9% APY (section 05)

Must be included in the video:

> "Sectora's staking is already live on Ethereum mainnet. $SECT holders can deposit their tokens at sectoraorg.com/staking and earn 14.9% APY, accrued every second. There is no lock-up: you can claim your rewards and withdraw your deposit whenever you want, with no penalty. Rewards are paid from a pool of 1.49 million $SECT that the foundation loaded before the first deposit, and the contract is verified on Etherscan."

- What to show: the staking console, which works out what a deposit earns per second, per day, per month and per year, and the step-by-step guide.

Staking app: https://sectoraorg.com/staking/

Contract on Etherscan: https://etherscan.io/address/0x79Cb8B3B3e81a2B25C6d7250c3C5a742aa8320E0#code

3.6 Hash Market on testnet (section 06)

- What to say: the Hash Market is already live on testnet. You claim free test tSECT, buy hash power, earn rewards every second and register a security node. tSECT has no value; the same rules will run on mainnet with $SECT.
- What to show: the testnet dashboard.

Check: https://sectoraorg.com/dash

3.7 No presale (section 07, "Distribution")

- What to say: $SECT had no presale, no private round and no tokens set aside for investors. The whole token is on the open market: it is bought and sold on Uniswap, with no minimums and no lock-ups.
- What to show: the "Distribution" section.

Check: https://sectoraorg.com/#offer

3.8 Projects ("Our projects")

- What to say: Sectora has seven products on one security layer. Six already have their interface 100% finished: staking is already launched on Ethereum mainnet and the other five are in final testing on testnet, ahead of their mainnet launch. The USD-SEC stablecoin is in development.
- What to show: the "Our projects" section and then, on screen, open each interface one by one:
- SectoraScan (Layer 3 blockchain): https://sectoraorg.com/sectorascan
- Asset tokenization (RWA): https://sectoraorg.com/sectorascan#/tokenize
- Hash Market (security node validation): https://sectoraorg.com/dash
- Sectora Shield (cybersecurity software): https://sectoraorg.com/security
- Staking (Ethereum mainnet): https://sectoraorg.com/staking/
- Sectora DEX: https://sectoraorg.com/dex

Check: https://sectoraorg.com/#projects

3.9 Roadmap ("Roadmap")

- What to say: phase 1 (contract, audit, registration and liquidity) is complete and phase 2 (testnet and staking on mainnet) is under way. On March 15, 2027 come the supply reduction and the start of exchange listings.
- What to show: the "Roadmap" section.

Check: https://sectoraorg.com/#roadmap

3.10 Supply and calculator ("Supply")

- What to say: the initial supply is 50 million $SECT and it will be reduced once, on March 15, 2027, to 25 million. The contract is renounced and has no mint function: no one can create more tokens. Taxes: 0% on buys and sells.
- What to show: the "Supply" section and the calculator with the 1% scenario.

> **Note:** The calculator is only an example for understanding the supply, never a price prediction.

Check: https://sectoraorg.com/#supply

3.11 Press and events ("Press" and "Events")

- What to say: the launch was published on AP News and Benzinga. In 2027 Sectora will be at three confirmed conferences: Bitcoin 2027 (Nashville), Blockchain Forum 2027 (Moscow) and Consensus 2027 (Miami).
- What to show: the "Press" and "Events" sections.

Press: https://sectoraorg.com/#press

Events: https://sectoraorg.com/#events

---

4. HOW TO BUY (TO EXPLAIN ON SCREEN)

> **IMPORTANT MENTION: HOW TO BUY SAFELY**
>
> Must be included in the video when explaining the purchase on screen:
>
> "Buy $SECT only through the official Uniswap link on sectoraorg.com, and always check that the contract address is 0x8C9984B06281f1CA9416e493c2E602AaB08513db. Any other token using the $SECT name is fake. Sectora will never ask for your seed phrase or ask you to send it funds."

1. Install an Ethereum-compatible wallet, such as MetaMask or Trust Wallet.
2. Hold USDT on the Ethereum network and a small amount of ETH for the network fee.
3. Buy $SECT only on the official Uniswap website (app.uniswap.org), using this official link:
https://app.uniswap.org/swap?inputCurrency=0xdAC17F958D2ee523a2206206994597C13D831ec7&outputCurrency=0x8C9984B06281f1CA9416e493c2E602AaB08513db&chain=ethereum
4. Check that the contract address is 0x8C9984B06281f1CA9416e493c2E602AaB08513db.

5. Connect the wallet, enter the USDT amount, review and confirm the transaction.
6. If the token does not appear in the wallet, import it using the contract address.
